

MY RAINFOREST

Rainforests are dense, humid, thick and green. The rainforest looks like an impenetrable green wall. There are many animals in the rainforest close to extinction due to deforestation and lack of food. There are also many plants in rainforests. In the rainforest the sounds you can hear are birds tweeting, monkeys laughing, leaves waving and water trickling. The colours in the rainforest are a mix of rainbows. Here is a photo of me leaning against a tree.
