

ME IN A RAINFOREST

Rainforest contain more then 80% of the land species on earth.

I was standing in a damp, noisy rainforest with many animals. I walked through the wet plants but it never end. I was tired so I sat down quietly. Suddenly there was water splashing on my soft hair. It was a waterfall so I ducked down. The trees looked like a monster, trying to eat me. I ran away from it. There were many animals here, like laughing monkeys, hissing snakes, running lizards, and a big tiger.
