

Visiting the Daintree Rainforest

“Chirp” went the birds as they soared joyfully in the sky.
“Hiss” went the snake as it slithered stealthily by.
“Splash” went the waterfall falling down the cliff.

This is me. I am at an exotic waterfall. However, this waterfall was so high! I am trying to

see how high it is and I am stunned! Next, I feel the urge to find out how deep it is but resist because I know that it might be very, very deep.

The Daintree Rainforest is an exotic and beautiful place, full of Flora which decorates the rainforest and the Fauna which roams around free in the wild. There are vines, trees, flowers, fern, insects, leaf litter and many more.
