

## Me and an Amazon rainforest

Here is a picture of me in an Amazon rainforest about to fall into the water and fortunately I managed to hold on. It was scary because I saw lots of piranhas in the water and I was afraid I would fall off. I am experiencing one of the most attractive and beautiful places on earth. I am freezing but I can't think of cold when I'm in a beautiful place like this.

My favourite thing about a Rainforest is hearing the birds, the water bang into the rocks. Another wonderful thing about being in rainforest is that it is filled with some beautiful animals, such as, orangutans, jaguars, insects, fish, monkeys, cassowaries, tigers and some marvellous birds.
